<https://github.com/RaevLogic> 

I'm a veteran, a father, and looking to bring immediate value to your company! Constantly improving my work and myself. Interested in full-stack development, new technologies and bringing a positive, "adapt and overcome" mindset to every environment I'm a part of.

---

## Skills

- Javascript
- React / Redux
- Git
- A11y
- Node.js / Express / REST
- MongoDB
- Jest
- Travis CI / Netlify / Heroku

---

## Experience

2019 – PRESENT

### Software Developer / Nouri, Inc

- Building a custom REST API with the Nouri team, utilizing Node/Express, Jest, and MongoDB.
- Mentor other developers and lead scrum meetings.
- Part of the planning for construction of prototype.

2018 – PRESENT

### Front-end Contributor / Operation Code

- Worked with lead maintainer at Operation Code to port page from create-react-app to Next.js application, reducing lines of code by +50% with full coverage on added lines of code.  
(<https://operation-code.now.sh/policy>)
- Introduced build stages into Travis to run linting and testing scripts in parallel for faster build times.

---

## Education

2018 – PRESENT

### Associate of Science / Paradise Valley CC, AZ (Fall 2019 Grad)

---

## Activities

- Staying fit
- Mentoring kids with depression/anxiety
- Traveling and relaxing with my son
