I'm a veteran, a father, and interested in all things Javascript! Passionate about learning, personal improvement, and new technologies. Interested in full-stack development and bringing a positive mindset to every environment I'm a part of.

Skills

- Javascript
- React / Redux
- Ruby
- A11y

- Node.js / Express / REST
- MongoDB / PostgreSQL
- Jest / RSpec
- Travis CI / Netlify / Heroku

Experience

2018 – PRESENT

Front-end Contributor / Operation Code

-- Worked with lead maintainer at Operation Code to port page from create-react-app to Next.js application, reducing lines of code by +50% with full coverage on added lines of code. (https://operation-code.now.sh/policy)

-- Introduced build stages into Travis to run linting and testing scripts in parallel for faster build times. Currently working on Cypress.io integration to complete this task.

2018 – PRESENT

Weather API App

Weather app built with React, Redux, and Nodejs. Utilizes Google's Javascript Map API and the OpenWeatherMap API. Displays multiple 5-day forecasts based on user-specified cities in the US.

Education

2018 – PRESENT

B.S. Software Engineering (W.I.P) / Paradise Valley CC, AZ

Activities

- Contributing to open source
- Helping/Mentoring kids with depression/anxiety
- Fitness, traveling, and relaxing with my family
